

CALIFORNIA DIVISION OF MINES AND GEOLOGY

Supplement no. 2 to Fault Evaluation Report FER-69

May 15, 1978

1. Name of fault group:

Faults along the San Gabriel Range front between San Antonio Canyon on the east and Big Tujunga Canyon on the west. Includes such named faults as the Sierra Madre fault, the San Antonio fault, the Sawpit Canyon fault, the south branch of the San Gabriel fault, the JPL fault, and the Mt. Lukens thrust fault.

4. List of references:

Kamb, B., Allen, C., Proctor, R.J., Crook, R., Jr., 1978, Earthquake hazard study of the Sierra Madre fault system: in Lamar, D.L., editor, Geologic guide and engineering case histories, Los Angeles metropolitan area, Association of Engineering Geologists First Annual California Section Conference, p. 102-111. No map.
